Sprint Goal

In this sprint we aim to implement core security features including login/logout/register/edit account.

Sprint Backlog

Epic Number	Epic Title	Story Title	Description	Estimation	Status
1	Security	Security | Administrator Login	As an admin user I would like to log in to the system such that I can start to manage the content. **Acceptance Criteria:** * Admin users will be created in database manually with "system admin" role. * Admin user will enter their username. * Admin user will enter their password. * Admin user will click Login buton. * Admin user will be redirected to the home page if succesfully logged in. * Admin user will be warned via an error message if log in is unsuccesfull.	8	Planned
1	Security	Security | Logout	As a user I would like to logout from the system such that I can securely leave the system after finishing my job. **Acceptance Criteria:** * User will click on Logout Link/Button. * User will be redirected to login page.	5	Planned
1	Security	Security | Create Account	As an end user I would like to register to the system such that I can start to discover the system. **Acceptance Criteria:** * User will click on signup button. * User will enter his First Name (Mandatory). * User will enter his Last Name (Mandatory). * User will enter his Birth Date (Mandatory). * User will enter his Birth Place/Country (Mandatory). * User will enter his Birth Place/City (Mandatory). * User will select his/her Gender (Mandatory). * User will enter their address information (Can be freetext) (Optional). * User will enter their Phone Number (Optional). * User will enter their email (Mandatory). * User will click Register buton. * User will be warned via error message if mandatory fields are missing or not valid (eg. email). * User will receive an email with a link to create password page. * User will enter his password two times. * User will be redirected to the login page if succesfully changed password, and be forced to log in with new password. * User will be warned via an error message if passwords are not matched. * Username will be the email. * End users will be created in database automatically after succesfull register progress with "end user" role.	34	Planned
1	Security	Security | End User Login	As an end user I would like to log in to the system such that I can start to discover the system. **Acceptance Criteria:** * Users can enter their email. * Users can enter their password. * Users can click Login buton. * Users are redirected to the home page if succesfully logged in. * Users are warned via error message if log in is unsuccesfull.	8	Planned

	1	Security	Security | Delete Account	As an end user I would like to delete my account from the system such that I can not log in without registering again. **Acceptance Criteria:** * Users can click delete account button. * Users can approve delete via approving pop-up modal. * Users are warned via error message if delete is unsuccesfull.	8	Planned
	1	Security	Security | Edit Account	As an end user I would like to update my information registered to the system such that I can make changes in my account whenever I want to. **Acceptance Criteria:** * Users can change their name. * Users can change their email. * Users can change their password. * Users can change their phone number. * Users can click Update button. * Users are redirected to the profile page if succesfully updated. * Users are warned via error message if update is unsuccesfull.	8	Planned
